Dear Sir/Madam,

Hope you are doing well. I am Prathamesh Tambe, currently pursuing Master of science in Information Systems from Northeastern University in Boston graduating in May 2020. I found about an open position at your company from LinkedIn and I would like to express my interest for the position.

I have over **5 years of experience** in multiple cutting-edge web technologies from Front end to Back end like **JavaScript, Angular, NodeJS, PHP, Drupal 7 and Ionic framework**. During this professional period, I have contributed to gathering requirements from clients, establishing scope of project, determining the best tech stack for it, designing the overall architecture and developing modules for it. I have also engaged in testing and operations. I am a very enthusiastic team worker as I like to go out of my way to help and guide others. At MathWorks, I learnt more about D3.js visualizations, Perl scripting, AngularJS, PHP and MS SQL.

After reading little bit about your company on the internet, I feel that you are looking for a confident professional who can multitask well and manage development at all layers like frontend, backend and on dev-ops layer with energy and enthusiasm. Due to my experience with many teams, I think of myself as a 'jack of all trades' and I think I can bring that to your organization too.

I would like to discuss more about the position and about company with you and answer any questions that you might have about me. I have attached my resume with the mail which has my contact details. Please feel free to contact me.

Thanks and Regards,
Prathamesh Tambe
